

Tubular system and interstitium of the kidney: (Patho-) physiology and crosstalk

Seminar

Prof. Dr. Timothy Hla

Harvard Medical School, Department of Surgery Boston Children's Hospital

Sphingolipid mediators in physiology and medicine

Timothy Hla received his Ph.D. in biochemistry from The George Washington University. Following a post-doctoral training period in which he worked in the lab of Thomas Maciag, he started his laboratory at the Holland Laboratory at the American Red Cross, Rockville, MD. He was recruited to the University of Connecticut School of Medicine in Farmington, CT where he founded the research Center for Vascular Biology and was eventually promoted to Professor. In 2009, he was recruited as a Professor and Director of the Center for Vascular Biology at Weill Cornell Medicine, Cornell University.

He moved his research program to Boston Children's Hospital in 2016 where he is appointed as an investigator at the Vascular Biology Program and Patricia K. Donohoe Professor of Surgery at the Harvard Medical School.

Dr. Hla is an honorary member of the Japanese Biochemical Society, received an honorary M.D. degree from the Goethe University, Frankfurt, Germany and a MERIT award from the NHLBI, NIH in 2006.

Time: Monday, September 02, 2024, 16:30h

Location: Seminarraum Physiologie

VKL 4.1.29
